## THORBURN'S PERFECT SEED DISPLAY CABINET

This novel cabinet is 30 inches high and only 15 inches wide—a convenient size for standing on a counter. It has 40 compartments for vegetable, and 39 for flower seeds. Each compartment holds 10 (or more) packets. The cabinet will thus hold 790 (or more) packets in 79 distinct sorts, the whole packet being visible. No matter how few packets are in the compartments, they stand to the front, and the same uniform display is maintained as well when the cabinet is nearly empty as when it is full. When exhibited in this cabinet, our handsome colored lithographic packets will sell themselves.

Price, \$5; free on board; no charge for boxing.

### HANDSOME COLORED LITHOGRAPHIC PACKETS

We offer the following varieties of vegetable seeds and flower seeds in handsome illuminated packets. These packets are not to be confounded with the cheap ones usually sold. They are generally supplied in such paper

up fresh by ourselves, of our best seeds, and contain much more seed than is
